HIGHEST ENROLLMENT IN SCHOOL'S HISTORY

Five Hundred and Fifty-Three Pupils at Start of the Autumn Semester

The public schools of Tonopah assembled for the fall semester this morning with the usual tremor of excitement and expectation, but by noon all was serenity and the teachers and the teachable were well settled in their work. Superintendent Dilworth called together his teachers yesterday afternoon to outline his plans for the year, and give all necessary instructions to start classes this morning. Mr. Tregloan and Mr. Herring, members of the board of trustees, were present to extend a welcome to all teachers and to assure the board's support for the best year in the Tonopah schools. The enrollment in the high school this morning was 58. Fifteen of these are just entering as freshmen, and there are eleven in all who are candidates for graduation. In the grades approximately 425 children attended this morning and Miss Foltz estimates the applicants for kindergarten work at about fifty. In all the outlook is for a big year, and, with classes in session on the opening day, appreciable results from the start.

The outlook for good live student interest is particularly bright. Moving spirits in athletics are already at work, and this evening all boy students will meet to look into the chances for a good football team. Five veterans are already enrolled, and some of the newer material is very likely. Special stress will be laid on all student activities. Athletics will be featured among the boys and girls and all will have an opportunity to assert a talent, whether in debate, music, dramatics or athletics. Mr. Dilworth wishes to make particular announcement to mothers, that they do not allow their children on the school grounds before 8:45 in the morning and 1 o'clock at noon. This is important for the reason that there will be no teacher in charge of the grounds. It is also desired that all know the age requirements for entering children. No child who has not already passed his fourth birthday will be admitted to the kindergarten, and no child who will not be six years old before January 1, 1916, will be admitted to the grammar grades.
